

Vivago

Safety and wellbeing solutions
for preventive care

Smart technology to support safety and wellbeing

Vivago solution combines an intelligent nurse call system with real-time wellbeing monitoring, analysis, and reports.

Real-time analysis of customers' health and wellbeing enables **preventive measures, safety alarms and more customer centric care.**

Real-time wellbeing information and individual monitoring provide a real-time snapshot of the individual wellbeing status and a wider view of customer groups' wellbeing. Solution is scalable to healthcare units of different sizes and to the home.

Vivago solution adapts to the customer's needs

Solution adapts to customer's needs and covers the whole chain of care from home care to assisted living, care homes, hospitals, and rehabilitation.

Benefits in care work

- Automatic alarms and wellbeing notifications indicate changes in the customer's wellbeing.
- Customers in need of care are identified, changes in condition can be addressed quickly and the need for unplanned acute care is reduced.
- Reduction of care days brings considerable cost savings.
- Real-time wellbeing data supports the monitoring of the effectiveness of the care and medication.

Real-time adaptive algorithms for activity and sleep measurement

Vivago solution measures user's activity, sleep and circadian rhythm in real-time.

At the core of the solution is the Vivago Vista software, which collects and analyses alarms, notifications and wellbeing information sent by Vivago watches, base stations and other alarm devices. Vivago Vista software is medical device approved and the produced data can be used as an aid in diagnostics and monitoring the effectiveness of care.

The algorithms based on sleep medicine have been developed and validated in co-operation with sleep researchers.

The algorithms have been clinically validated in a sleep laboratory and the measurement has a sensitivity of more than 96% compared to polysomnography.

Vivago® offers smart safety and wellbeing solutions for preventive care. The innovative solutions cover the whole care chain from home care to assisted living, hospitals and rehabilitation.

Vivago solutions increase the feeling of safety with automatic alarms and by providing wide range of wellbeing information to support daily care and to follow-up the effectiveness of care. Real-time notifications inform about the changes in the person's wellbeing and it enables care providers to react proactively and focus on individual care. Wellbeing information can also be shared with relatives.

As an established health technology provider, Vivago already ensures safety for tens of thousands of individuals in Europe. The high-quality products are manufactured in Finland.

Supporting a good life and bringing tools for better care.
