

Vivago Oy announces appointment of new CEO

Henrik Resman has been appointed as the new CEO of Vivago Oy as of 15.8.2023

Niina Vilkas will leave her position as CEO of Vivago and continue as a member of the company's Board of Directors. Following Niina Vilkas' announcement of her wish to move on to new challenges, Henrik Resman has been appointed CEO of Vivago. Henrik Resman has taken up his position on 15 August 2023.

Vivago has developed strongly in recent years. Building the company's quality system and processes, and renewing its core business, have created new opportunities in both the domestic and export markets. The Vivago Vista software has medical device approval and can be used as an aid in diagnostics and monitoring the effectiveness of care. An expanding network of partners in European countries is enabling Vivago to grow into an internationally recognised health technology player. Vivago would therefore like to collectively thank Niina Vilkas for her valuable contribution to building the company's success.

Henrik Resman has a strong background in developing international business and leading companies on an international growth path.

"It's great to be part of building Vivago into a force to be reckoned with in the global market. The good work done by Niina is a great basis for this," says Henrik Resman, commenting on the future.
