

## Dosell digital medication dispensing robot strengthens Vivago's service offering

### **Vivago Ltd is the distributor in Finland for digital medication dispensing robot Dosell**

Vivago Ltd is a Finnish health technology company offering intelligent safety and wellbeing solutions for preventive care. With the new co-operation agreement, Vivago operates as a distributor of the Swedish Dosell digital medication dispensing robot in Finland. Dosell's manufacturer is iZafe Group AB, a health technology company listed on the Stockholm Stock Exchange. Dosell is currently widely used in Sweden and Norway.

*"We are very excited about the co-operation between Vivago and iZafe. This co-operation will be an important step in future of Vivago and building up our service offering. Co-operation with iZafe and the digital drug dispensing robot enables more comprehensive service offering to our customers in Finland. Vivago's safety and wellbeing solutions together with Dosell enables safety and better care for the elderly"* says Vivago's CEO Niina Vilkas.

*"At the end of a year of intense development and investments in products, technology and software, I am happy to see series of joint pilot projects begin for the digital medication dispensing robot Dosell. It is a necessary step for us to enhance safety and provide better care to our elderly people at scale. I believe Vivago is well-suited for the job and we look forward to seeing them build a larger customer base in the coming years. I am thankful for their commitment to automated dispensing of medication in dose-packed sachets from the dispensing robot Dosell."* Comments Anders Segerström, CEO iZafe Group.

### **Digital medication dispensing robot supports safer living better care and safer living at home**

The Dosell digital medication dispensing robot improves medication safety and guides, for example, a home care customer to take prescribed medications correctly and in a timely manner. This reduces medication errors and accidents and allows for independent living at home. Dosell supports the safety of the customer and relative by sending an alert to either the caregiver or a relative if the medication is not taken.

The greater use of medicines by the elderly is increasing the pressure on healthcare and the need to develop safe medication distribution. The advantages of the Dosell digital dispensing robot are the lowest price on the market, ease of use and small size. Dosell enables real-time monitoring of medication and supports the timeliness of care. The prioritization of working hours becomes easier and, for example, a home visit can focus on the actual care measures and the customer.
